

# UPGRADE FILTERS FOR COMPRESSED AIR SYSTEMS

## Optimize your Compressed Air System

Upgrade your compressed air system by using the new Donaldson Ultrafilter® filter element range and optimize the energy efficiency of your operations. The filter elements are available in numerous variations to make them fit into the housings of most popular filter brands.

Our performance is not just a promise – its proven! Due to the validation of the filter elements according to ISO 12500-1 and 12500-3, performance data are absolutely comparable.

The fast lane to the choice of the appropriate filter element: In a cross reference table, you will find exactly the element you need. The quick availability is guaranteed by the Donaldson European Distribution Center. Replacing a filter element is easier today than ever!

# Donaldson Filtration Benefits at a Glance

## Excellent Product Quality

- High-value products with high performance
- Innovative filter technology
- Energy-efficient products

## Tailor-made offers

- Competent consulting
- Extensive filtration know-how and expertise

## Compressed Air Product Range from a Single Source

- We offer a one-stop comprehensive filter element service – regardless of type and manufacturer

## Short Delivery Times

- European logistics centre with a 22.000 sqm floorspace
- Reduced delivery times and rapid fulfilment guaranteed
- Visits arranged by appointment

## Alliance Member

Donaldson contributes with its share of sustainability by continuously enhancing filtration solutions, based on energy savings and decreasing emissions. Donaldson Compressed Air and Process Filtration division is Blue Competence Alliance Member, networking for "protecting the environment with innovative technologies, conserving our resources, improving our quality of life and producing more efficiently".
