

PRODUCT PROFILE

STRATA CAP

2 in 1 pre cleaner and rain cap

FEATURES & BENEFITS:

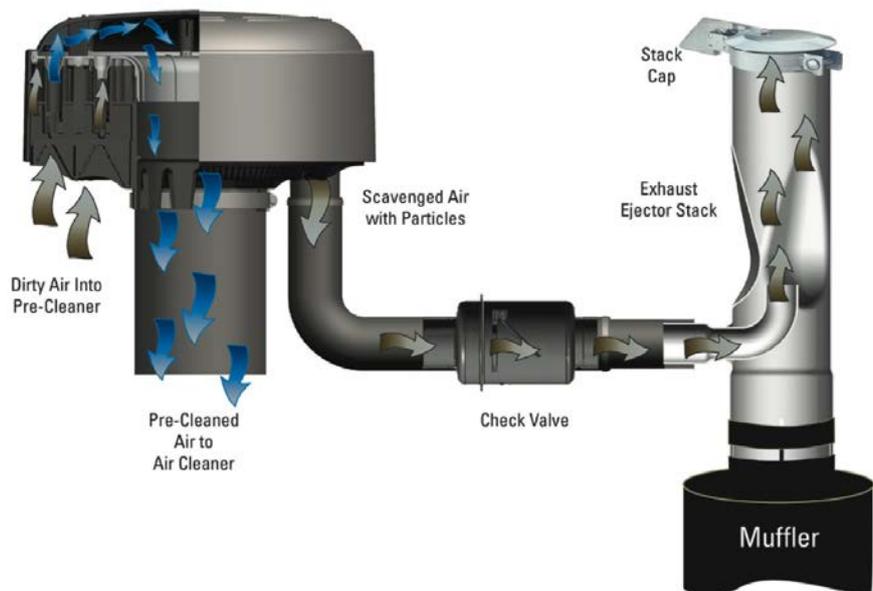

- Designed for high and extreme dust conditions
- Combined pre cleaner and rain cap
- 3 sizes available for air flows from 350 to 1140 cfm
- Operates at up to 96% efficiency
- Rugged, low profile UV resistant plastic construction will not corrode
- Can be opened for service if required. Clean with compressed air or water.
- 50mm scavenge connection

The Strata caps are a high efficiency pre cleaner designed to be used in conjunction with an exhaust scavenge system. These easy to install pre cleaners use our strata tube system to remove much of the larger contamination from the incoming air in your induction system. The contamination is vented through the exhaust using an ejector. The use of a Stratacap will extend your filter life by removing the bulk of incoming dirt before it reaches your air cleaner.

AVAILABLE MODELS

Part No.	Description	Suits inlet size	Air flow	Diameter Height
H002700	Pre cleaner strata cap - small	5" / 127mm	350 - 600 CFM	376 x 203
